

1.1.3 Area of Square

Algorithm : Area of a Square

1. **Start**
2. Read the **side length** of the square, s
3. Calculate the **area** using the formula:
$$\text{area} = s \times s$$
4. Display the **area**
5. **Stop**

Flowchart:

The screenshot shows the CODETANTRA IDE interface. On the left, the problem statement for '1.1.3. Calculate Area of the Square' is displayed, including the formula $\text{Area} = \text{side_length}^2$ and input/output formats. The main editor shows a Python script:

```
1 side = int(input())
2 print(side * side)
3
```

Below the code editor, the test results are shown:

- Average time: 0.003 s (3.25 ms)
- Maximum time: 0.004 s (4.00 ms)
- 2 out of 2 shown test case(s) passed
- 2 out of 2 hidden test case(s) passed

Test case details:

Test Case	Expected Output	Actual Output
Test case 1	25	25
Test case 2	25	25
